1st December, 2017. E.MAIL TO : THE SECRETARY GENERAL, U.N., USA.

“ THE ENTIRE HUMANITY CAN SPEAK ENGLISH WITHOUT TEXT BOOKS” : JN

Sub : PROPOSAL TO MAKE THE WHOLE WORLD POPULATION SPEAK ENGLISH, UNDER THE LEADERSHIP OF UNITED NATIONS, WITHIN A SHORT TIME

Inventor JACOB NETTIKKADAN (JN) of Kochi, Kerala, India, the greatest Philologist in the world, proposes to make the total world population speak the ordinary English Language **without English Text Books** in a short time, **on the below-given concept**, if the UN is ready to take leadership to organize the project. JN proposes to begin the project in those regions of the globe, where minimum 300 million people speak the same language, as the first phase, to be followed by others gradually, as the second phase. He wants to use his own **MOST ADVANCED LANGUAGE TEACHING TECHNOLOGY**, to make appropriate Apps in each vernacular, so that all people in each region can learn to speak English through their own mother tongue, in a simple way with the firm guarantee that **‘willing people need not fear to fail’**.

CONCEPT : Inventor JN proposes to USE HIS ‘MAGIC CHART’ IN ENGLISH, instead of the English Text Books, and teach people to speak English **within a short time**, with the help of Apps made in each vernacular. This is on the principle of the highest secret of philosophy of Language Teaching Technology, discovered by him : **People fail to speak a new language which they learn, for two major reasons** : 1) They are unable to construct themselves the needed sentences in the new language which they learn, to express the required ideas, by using appropriate words; 2) They do not know sufficient number of new usages of Verbs in the new language, each of which helps them to express the needed ideas accurately, clearly and flexibly. JN’s new technology takes care of both these items perfectly well

to guarantee success of the programme. JN's new methodology and his four volume English Text Books teach 1,877 types of expressions (sentences) in English, beyond which learners will not need further sentences in English. Similarly his methodology and his English Text Books teach 1,877 extra usages of Verb, to make his learners international communicators in English, whereas students in ordinary schools learn 12 extra usages of Verb called "12 tenses of Verb" in English, making them unable to express even the most ordinary ideas accurately, extensively and flexibly.

The main purpose of this idea is to encourage people of all levels to start to speak English and get interested to increase their standard and depth of scholarly knowledge in English, by using English Text Books later on.

PRESENTATION OF THE PROGRAMME :

In this new style of teaching English without English Text Books, Inventor JN will use and explain his own MAGIC CHART in English (a Universally copy-righted item) which will reveal shocking facts about languages. After that, he will teach a small sentence in English, and get it translated into the local language. Then the audience will get the ability to make 10,000 or even 1,00,000 (one hundred thousand) similar sentences in English THEMSELVES, if they know as many words in English, WITHOUT ANY FURTHER TEACHING. The Inventor will then demonstrate 'How to get fluency' to speak that type of sentence in English, primarily to inspire interest in people to speak English and then instill courage and self confidence in them to handle English. After that, the Inventor will teach TEN NEW PATTERNS OF SENTENCES IN ENGLISH, which each person has to learn to make and practice to speak quickly, one after another, along with some ADDITIONAL ITEMS NEEDED FOR SPEAKING DIFFERENT TYPES OF SENTENCES in English, and the rationale behind these. Then the learners will start to speak English easily themselves and with self confidence, as their mother tongue.

MODE OF FUNCTIONING OF THE PROJECT :

First of all, the UN authorities have to negotiate with Inventor JN and enter into a contract with him to buy the total concept of the project on agreed terms of payment, for distribution to and implementation in all the languages of the world in two phases. Then, It has to establish a suitable organization to acquire the technology from the Inventor and get sufficient number of personnel

trained, so that they can transfer the same technology to people of all other languages and train their people to handle the job and accomplish it independently, to make the programme a real success and enjoy the fruits of it. After that, the UN has to appoint an appropriate organization for each language, which will be responsible to look after the production of the Apps as well as the sale of the C.Ds. when made, to the people and also organize spreading of the system of speaking English by using the Apps as ASSOCIATES of the UN for implementing the programme and collect the sale proceeds on behalf of the UN, to replenish the capital and profit if any. At the first stage, the UN can start with those countries where minimum 300 (three hundred) MILLION people speak the same language, to be followed by others in order of priority of number of speakers of the language, as the second phase.

ADVANTAGES OF THE PROGRAMME :

First of all, English a common language spoken by large number of people in the world, especially the official language of UN will be spoken by all the people all over the world. This will promote globalization of all the people of the world in real terms and also promote commercial progress to usher in prosperity for all human beings. This will aggressively promote tourism all over the world. Over and above all these, UN can erase the blame among the common population of the world who believe that it is “a luxurious liability”, not doing any really useful thing for the global population.

An additional advantage will be that Inventor JN and his four volume English Text Books as well as the “The Importance of PERSONALITY DEVELOPMENT” **are now able to teach 5,700 totally** new items about English and Personality Development, which are not known to the British or others in the world. Moreover, JN can teach the entire English Language without any CONFUSIONS, DOUBTS AND/OR MISUNDERSTANDINGS, as also to produce **BEST ENGLISH TEACHERS** who can also give similar guarantees to their students and make all professional hands speak English confidently while providing great employability to them to enable them get suitable jobs or to become entrepreneurs to give employment to others. Above all these, JN has defined Education and all his teachings will be to inculcate excellent characteristics, lovable behaviour, ideal inter-personal relationship besides exemplary leadership qualities and abilities as well as managerial skills in all the students. It is expected that this TRUE EDUCATION will erase the terrorism and religious

fundamentalism everywhere, to allow humanity to live in peace, prosperity and happiness, without fearing people or leaders of any nation, under any pretext.

COST OF THE PROJECT : Lump sum royalty : **U.S.\$10,00,00,00,000** (US DOLLAR TEN BILLIONS or US\$ TEN THOUSAND MILLIONS), to be paid @ 50% for the first phase of the programme and balance 50% proportionately on successful completion of the second phase of the programme, within three years.

DISCOUNT FOR THE DEAL : 20% of the total amount, i.e. **2,000 MILLION US\$., (Two thousand million US Dollar)** will be offered as discount on the whole programme. It is requested that the UN may grant 20% (twenty percent) to each and every language which undertakes this programme of the UN.

MODE OF PAYMENT TO THE INVENTOR :

20% (Twenty per cent) of the US\$.5,00,00,00,000 (US DOLLAR FIVE BILLION or US DOLLAR FIVE THOUSAND MILLIONS) of the contract shall be paid when the written Agreement is made between the UN and the Inventor for the whole deal immediately after explaining of the Concept 100% satisfactorily and after teaching the first type of sentence by the Inventor in the first phase. Further payment of 10% (Ten per cent) of the balance amount, each shall be made to the Inventor while teaching each extra type of sentence up to 9 (nine) types. The final balance amount shall be paid to the inventor when the last lot of items are taught in the first phase of the project.

It was reported in the Indian media that China failed to produce good result in their first attempt of making a similar App in 2014. Now they are again trying to make a new one. But, they have not done so severe research as we have done and so they may fail to meet the Technological requirements.

Awaiting a favourable response and with warm personal regards,

INVENTOR JACOB NETTIKKDAN,
Director, JN. BEST ENGLISH TEACHERS,
